

Development of Booking Software for SDPK Platform

The SDPK (Skill Delivery Platform Kerala) project includes the setting up of a teleconferencing system connecting 150 colleges and 3 studios. The colleges included in the project are Govt. Engineering colleges, Govt. Polytechnic colleges and Private Engineering colleges . Each of our classrooms have a seating capacity of 60 . Currently, the above-mentioned infrastructure is capable of being used for conducting teleconference sessions with a capacity of around 5000 participants at a time. Apart from the primary motive of providing industry-oriented courses, this facility can also be used by various departments under Government of Kerala for conducting various sessions and also to communicate with employees who are located across Kerala . It can also be used by NGOs/Private Sector and by Citizens . Through our platform we can host 10 concurrent meetings. In these circumstances, it is proposed to create a booking software for slot management of classrooms.
