

## **For Security Feature Generating Software for Government Central Press, Thiruvananthapuram**

The Directorate of Printing invites Expressions of Interest (EOI) from eligible startups and technology providers capable of developing software solutions for integrating advanced security features into printed and digital documents produced at the Government Central Press, Thiruvananthapuram.

### **Objective:**

To identify and empanel software solutions that can generate and integrate the following security features:

- Void Pantograph
- Microtext
- QR Code
- Bar Code

The software must support output generation in both printed and digital formats, suitable for secure government document printing.

### **Scope of Work:**

- Develop or provide software capable of embedding the aforementioned security elements.
- Provide mechanisms for both physical print output and secure digital document generation.
- Ensure reliability, confidentiality, and compliance with government data and printing standards.
