

## **Small-Scale Automated / Semi-Automated Multilevel Car Parking System (MLCPS) or Rotary Parking System for the Motor Vehicles Department**

The Motor Vehicles Department proposes to implement a Small-Scale Automated / Semi-Automated Multilevel Car Parking System (MLCPS) or Rotary Parking System at the Transport Commissionerate, within the land owned by the Department. The system is intended to accommodate approximately 20 official vehicles and optimize the available parking space through efficient vertical parking solutions.

In this context, the Department invites Expressions of Interest (EOI) from eligible and technically competent startup companies specializing in the design, supply, installation, and commissioning of Small-Scale Automated / Semi-Automated Multilevel Car Parking Systems (MLCPS) or Rotary Parking Systems.

The objective of this EOI is to identify and shortlist suitable startup companies with proven technical capability and experience in implementing small-scale automated or semi-automated parking systems for the proposed installation at the Transport Commissionerate.
